SUMMARY

Aspiring Python Full Stack Developer with hands-on experience in Python, Django, MySQL, SQL, PL/SQL fundamentals, HTML, CSS, JavaScript, React.js (basics), and REST API development. Skilled in building and testing database-driven full-stack applications, writing and debugging SQL queries, and performing unit testing and data analysis using standard SDLC and Agile-aligned practices. Seeking a Software Developer role to contribute to application enhancement, database reporting, and backend engineering.

TRAINING / INTERNSHIP

Python Full Stack Development Training

Mar 2026 – Jul 2026

Training Program

- Completed a 5-month full stack development training program covering Python, Django, MySQL, HTML, CSS, and JavaScript, building 4+ end-to-end full-stack modules.
- Developed full-stack web applications end-to-end, integrating front-end interfaces with back-end business logic across 3+ practice projects.
- Built and tested 15+ RESTful API endpoints for database-driven applications using Django, validated with Postman for functional accuracy.
- Implemented MySQL database integration for 5+ applications, including schema design, SQL query writing, and query optimization with Django web applications.
- Performed unit testing and debugging of application modules, tracked defects, and documented root-cause fixes to ensure functional accuracy.
- Practiced coding, version control with Git/GitHub, and basic Agile-aligned deployment workflows.

AI/ML/NLP Intern

Jan 2024 – Jun 2024

Internship

- Completed 200+ hours of hands-on training in Machine Learning, NLP, and AI concepts.
- Developed 3+ mini-projects involving data preprocessing, data analysis, model training, and validation.
- Applied ML algorithms and NLP pipelines to practical use cases, with documentation and project tracking.
- Collaborated with mentors through technical discussions and knowledge-sharing sessions.

PROJECTS

Online Shopping Management System

2025

SQL / DBMS

- Designed 10+ normalized database tables for customers, products, orders, and payments, applying primary/foreign keys and relationships.
- Developed SQL queries using joins, subqueries, and aggregate functions to generate order, customer, and payment reports.
- Performed unit testing on database workflows and query outputs to ensure data accuracy and integrity.

Fake News Detection & Media Integrity Analytics

2025

Machine Learning / NLP

- Developed an automated fake news classification system using Python, NLP, and TF-IDF on 10,000+ records.
- Achieved 92% accuracy through text preprocessing, data analysis, and machine learning-based classification.
- Evaluated 3 model configurations using precision, recall, and F1-score to select the optimal model.

CycloneAI — Real-Time Cyclone Detection & Forecasting

2026

Deep Learning / Multimodal AI

- Built a multimodal deep learning system in PyTorch combining satellite imagery, weather sequence data, and environmental features to detect cyclones and forecast intensity, category, and trajectory using transformer and EfficientNet+LSTM fusion architectures.
- Achieved 93.73% detection recall and 70.75% precision across a multi-task model handling detection, wind-speed regression, and category/risk classification.
- Developed an end-to-end pipeline (data ingestion, preprocessing, AdamW training with cosine annealing, evaluation) and deployed a real-time Streamlit dashboard with interactive trajectory maps and risk visualizations, containerized with Docker.

EDUCATION

B.Tech – Computer Science Engineering (AI & ML), SVCET, Chittoor

2022 – 2026

Intermediate (BIEAP), Narayana Junior College, Kadapa

2020 – 2022

SKILLS

Programming: Python, JavaScript

Database: SQL (DDL/DML, Joins, Subqueries, Aggregations, Indexing), PL/SQL (fundamentals), MySQL, Database Management Systems

Web Technologies: HTML, CSS, React.js (basics), REST API (basics)

Frameworks & Libraries: Django, Pandas, NumPy, Scikit-learn

AI/ML: Machine Learning, Deep Learning, NLP, LLM, RAG, ANN, CNN, RNN

Developer Tools: Git, GitHub, VS Code

Soft Skills: Problem-Solving, Collaboration, Communication, Attention to Detail, Adaptability, Time Management, Continuous Learning, Mentorship

CERTIFICATES

Big Data Analytics (Deloitte, 2025) | Solutions Architecture Job Simulation, AWS (Forage, 2025) | Programming for Data Analytics – Python (L&T EduTech, 2024) | Data Engineering Foundation (L&T EduTech, 2024) | AI, Deep Learning & NLP (ExcelR Solutions, 2024) | Full Stack Development (Thops Tech Career Solutions, 2026)
